EDUCATION

York University

Bachelor of Science, Computer Science

Toronto, Ontario

Jan 2024 – April 2028

EXPERIENCE

Full Stack Developer

May 2025 – Present

ElleHacks

Toronto, Ontario

- Engineered and maintained **RESTful backend services** in **Java** and **Node.js** for a **MERN-based** hackathon platform serving **250+** users, supporting application submission and data management workflows.
- Wrote **unit and integration tests** using **JUnit** covering **85%+ of backend logic**, and set up **Jenkins CI/CD pipelines** to automate builds and reduce post-deploy defects by **30%**.
- Managed **Git/GitLab version control** across a **cross-functional remote team**, enforcing **code review workflows** and **agile sprint practices** that cut merge conflicts by **40%**.

Software Engineer

Aug 2025 – Jan 2026

YU Blueprint

Toronto, Ontario

- Built an interactive **scam-prevention training simulator** in **React** and **Java**, using a **Linux development environment** with **Gradle** for build automation, reducing build time by **25%**.
- Designed **accessible UI components** for **non-technical users**, applying **WCAG 2.1 accessibility standards** and iterative **user testing** to achieve a **92% task-completion rate** in usability trials.
- Collaborated in an **agile, cross-functional team** to deliver **feature design, QA testing, and deployment** of a product projected to impact **500+ seniors annually**.

PROJECTS

RouteTO | Python, React, Leaflet.js, Docker, Kubernetes, Google Maps API, REST APIs

Aug 2025

- Built a **Toronto safety navigation system** containerized with **Docker** and deployed via **Kubernetes** (Helm Charts), processing **441K crime records** from the Toronto Police Service dataset.
- Applied **K-Means clustering and geospatial analysis** to identify crime hotspots, and delivered a **React + Leaflet.js** map interface for real-time route visualization with safety overlays.
- Wrote **unit tests** for geospatial processing modules using **pytest**, achieving **80%+ coverage** and validating hotspot accuracy against ground-truth police incident data.

InsightIQ | Python, Pandas, NumPy, Scikit-learn, Prophet, Matplotlib

Apr 2025 – May 2025

- Analyzed **1.85M+ user interactions** for Federato's RiskOps platform using **Markov Chains and Graph Analysis**, surfacing **3 high-drop engagement bottlenecks** that informed a feature redesign.
- Developed a **Multidimensional Poverty Index** using **PCA and K-Means Clustering** for SAP, classifying **5 poverty tiers** across a dataset of **200K+ records** with **91% cluster silhouette score**.
- Built **AI-driven sales forecasting models** (Prophet, Exponential Smoothing) for TouchBistro, predicting restaurant revenue with **MAPE under 8%** across **12 months** of historical data.

HWG Health Platform | React, Python, Flask, PostgreSQL, Docker, Gemini API

Sept 2025

- Built a **healthcare platform** using **React, Flask, and PostgreSQL**, containerized with **Docker** and integrating **Gemini AI** for symptom diagnosis and **AI-powered image analysis**.
- Implemented **TLS-secured API endpoints** and **token-based authentication (JWT)**, and used **Leaflet.js** to surface nearby clinics in real time for **500+ potential daily users**.
- Authored **design documentation** and **API specifications** per feature requirements, enabling **3 teammates** to independently implement and test assigned modules without blockers.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (PostgreSQL), JavaScript, HTML/CSS

Frameworks: React, Node.js, Flask, Express.js, FastAPI, JUnit, Material-UI

DevOps/Tools: Docker, Kubernetes, Helm, Jenkins, Git, GitLab, Gradle, Linux, Postman

Libraries: Pandas, NumPy, Matplotlib, Scikit-learn, Prophet
